02102 HF Unloaded Antenna

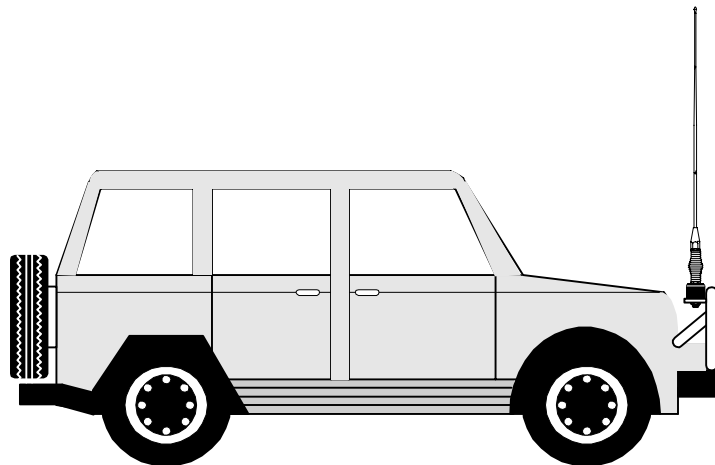

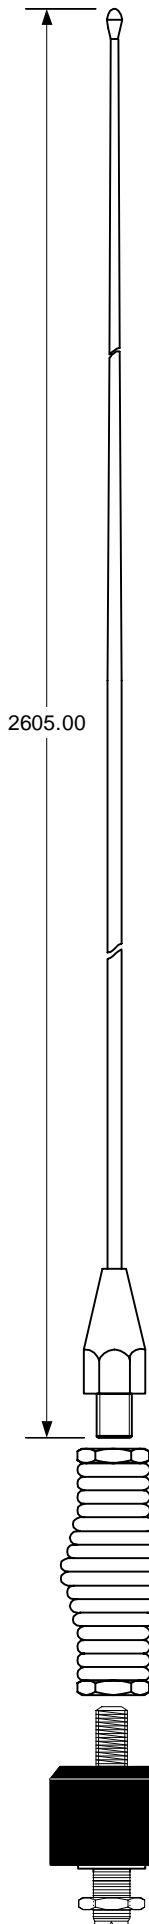

(Suitable for manual and automatic tuning units)

The model 02102 antenna is a rugged tapered Stainless Steel antenna built for use on both automatic and manual tuning units. Its heavy duty stainless Steel rod and robust fittings are designed to withstand rough environments.

The 02102 antenna radiating section is a Spring Hard, Ground & Polished 17/7PH tapered Stainless Steel rod.

Whip top and bottom fittings are constructed of Brass, finished in a Nickle Plating. The radiator is securely screwed into the base ferrule.

The antenna can be used on Spring Model 02750B in combination with Mobile Base Model 02733 (these items are sold separately).

Model	Length	Rod Diameter	Weight	Termination	Construction
02102	2.605M	Base 5.0mm Tip 2.55mm	*	1/2" BSW MaleThread	Spring Hard Ground & Polished 17/7PH Stainless Steel

02750B Spring
