

BUSS BAR ATTACHMENT HARDWARE

Buss Bar Attachment Hardware facilitates installation of Ground Buss Bars in virtually any application. Four models are available, providing your choice of insulation and mounting style. The shelter-mounted kits feature brackets for wall-mounting in shelter and roof-top applications. The tower-mounted kits utilize angle adaptors to facilitate installation on angle tower members. Insulated and non-insulated Buss Bar Attachment Hardware are also available. Ground Buss Bars must be purchased separately to suit your exact grounding requirements. These hardware solutions are also provided with the buss bar as part of a complete Ground Buss Bar Kit.

Insulated Shelter Kit

Non-Insulated Shelter Kit

Insulated Tower Kit

Non-Insulated Tower Kit
