

## 4" (102mm) Feed-thru Entry Panels

Aluminum Feed-thru Entry Panels enable multiple coax runs to enter buildings and shelters. These rugged panels support the coax at the entry point and prevent moisture from entering the building. Each panel features 4" (102mm) openings to accept boot assemblies. Each boot assembly must be fitted with a cushion to hold the coax in place. Feed-thru Entry Panels are offered with a broad selection of hole patterns and plate sizes to match your exact application. These entries can be used in both interior and exterior wall applications to create a neat and clean installation. Each Feed-thru Entry Panel includes a set of wall attachment hardware, including #14 x 1-1/2" (6mm x 38mm) stainless steel screws, finishing washers, and plastic anchors and is powder coated to ensure long term integrity and provide appealing aesthetics. Sealing caps for all openings are also included. Boots and cushions, or boot assembly kits must be purchased separately to accommodate specific coax requirements.
