

Quick Cable Clamps

The uniquely simple construction of the Benelec Quick Cable Clamp system has been developed to meet the high demands of installers for effective, easy to fit fixings for a variety of profiles.

Benelec's Quick Cable Clamps are suitable for all RF cable types in sizes of 1/2", 7/8", 1 1/4", and 1 5/8".

Test installations with a fixing torque of between 1.5 and 5 Nm have showed secure hold without deformation of the cable and change in the signal transmission characteristics.

Features

- ◆ High durability due to the use of non-corrosive stainless steel metal construction, with ageing and ultra-violet resistant, halogen free polyamide cable ducts.
- ◆ Installable onto c-profile rails commonly used in radio systems, as well as flat sectional steel to a maximum thickness of 9.3mm.
- ◆ Easy to use, the clamps (single cable type) consist of only two elements.
- ◆ The cable is protected against possible harm due to the unique construction of the tensioning assembly, which is permanently fixed to the polyamide shell.
- ◆ Secure hold without the need of a lock nut on the tensioning bolt as on other systems, giving faster and easier fixing.

Width of Clamps

cable type	single clamp	double/triple clamp
	width [mm]	width [mm]
1/2" Superflex	26	29
1/2"	26	29
7/8"	40	42
1 1/4"	50	52
1 5/8"	61	63

Part Numbers

cable type	cable clamp		
	Single	Double	Triple
1/2" Superflex	84020601	84020602	84020603
1/2"	84020501	84020502	84020503
7/8"	84020701	84020702	84020703
1 1/4"	84021001	84021002	N/A
1 5/8"	84021201	84021202	N/A

Packing Units & Weights

cable clamp	units [pcs.]	weights [kg]
84020601	200	14
84020501	200	14
84020701	100	11
84021001	100	14
84021201	100	16
84020602	100	11,5
84020502	100	11,5

Packing Units & Weights

cable clamp	units [pcs.]	weights [kg]
84020702	100	18
84021002	100	11
84021202	100	15
84020603	100	12,5
84020503	100	12,5
84020703	50	19
